SUMMARY

I am a software-engineer with an entrepreneurial mind and a creative drive that I fuel by learning new and noteworthy skills. With my past experience as a visual artist, I bring a valuable blend of aesthetic sensibility and technical skills.

SKILLS

Python | Flask | CSS | HTML | JavaScript | NodeJS | MongoDB | PostgreSQL | Git | React Native | ReactJS | Express

EXPERIENCE

Software Engineering Immersive - *General Assembly*   2019 - 2020

- A full-time 3-month software engineering bootcamp where we learned how to make full-stack applications with a range of different programs and frameworks

    Projects:

- Nomi - A replicated stock market trading application.

    Built using: React, ExpressJS, MongoDB

- Fixify - An App for free-lance mechanics to connect with clients

    Built using: React, Flask, PostGres

Assistant Accountant and Data-Entry Engineer - *Pioneer Direct Marketing*   2016 - 2018

- Coordinated with fellow employees to solve mathematical and technical problems through physical and electronic data.

Graphic Design Team Leader - *SpaceBound Artists*   2015 - 2017

- Directed and managed a team of ~10 other visual artists in an online setting to make designs for people affiliated within our community.

EDUCATION

General Assembly - *Software Engineering Bootcamp , Feb 2020*
